

Prompts

1. What is git? Why is it useful? What is the git workflow?

- GIT is online platform where multiple people can work on one topic without creatin confusion.

- It is useful because everyone can work on one topic or program without overwriten other person's work.

- <https://www.google.com/search?q=git+work+flow&oq=git+work+flow&aqs=cchrome..69i57j0i10i131i433j0i10l8.2627j0j7&sourceid=chrome&ie=UTF-8>

2. What are the 8 primitive data types in Java? What makes them each unique? What values can they hold?

- integer -number
- double- number with decimal
- float- number with more precise decimal
- char- one character
- byte- binary
- Boolean- true or false
- string- word

3. What is your favorite thing you learned this week?

- GIT hub and Eclipse. I was able to push Repository two times with just one issue. And created program by watching video on eclipse was real fun.
